

Youth event DEMO International 2024

Letter to exhibitors

Table Forêt Laurentides partners with Enviro Éduc-Action, the Canadian Woodlands Forum and SBC Cedar to organize **an educational day on September 20 as part of DEMO International 2024**. For the occasion, secondary schools in Outaouais and Laurentides will be invited to participate in the DEMO International 2024 youth event.

Table Forêt Laurentides will offer groups of 15 students aged 13 to 17 a guided tour on the event site in order to introduce them to the notions of sustainable forest management and the different facets of logging. To make the experience as enriching as possible, **Table Forêt Laurentides needs volunteer exhibitors** to demonstrate equipment and explain the tricks of the trade to young people, while answering their questions.

Are you interested in welcoming groups of students to your exhibition area? Fill out the participation form now:

[Participation form](#)

Your participation is essential. It will provide a stimulating path for students.

It is also possible to help us by sponsoring the youth event, in particular by financing bus transportation for a school (see the Sponsorship Plan).

Several forestry professionals will accompany the groups of students as senior facilitators and share their knowledge and passion for the forest. They will be volunteers and will come from various regional organizations. Junior leaders (forestry students) will also be hired to accompany the groups and support the senior guides.

The main objective of the youth event is to raise awareness among young people about forestry professions and to encourage them to consider a career in this promising sector.

Youth event DEMO International 2024

Organizers of the youth event:

With the participation of:

About Table Forêt Laurentides

A non-profit organization, Table Forêt Laurentides (TFL) is the reference in the Laurentian region when it comes to forestry education. Its primary mission is to raise awareness of sustainable forest management, while providing information on the different uses of wood material.

About Enviro Éduc-Action

The mission of Enviro Éduc-Action (EEA) is to educate and support Outaouais citizens and organizations towards eco-responsible behavior through the acquisition of environmental knowledge and behavior. A non-profit organization, it contributes to sustainable development by integrating youth at the heart of its actions.

About Canadian Woodlands Forum

The mission of the Canadian Woodlands Forum (CWF) is to improve the efficiency and profitability of forest operations, through a continued commitment to the sharing of knowledge, best practices and focused technological innovations.

About SBC Cedar

A leader in the white cedar shingle manufacturing industry, the company is one of the largest in North America. With its state-of-the-art equipment, SBC Cedar places the environment at the heart of its concerns and takes concrete actions for future generations, such as favoring sustainable development.
